

Distribution Patterns and Behaviors of Humpback Whales around Oahu, Kauai, Hawaii and Kahoolawe

Daniela Maldini, Ph.D.
Peter B. Nilsson, M. Sc.
PO Box 454
Maynard, MA 01754
dmaldini@earthwatch.org

Report prepared under contract AB133C-04-SE-0444
for the
Hawaiian Islands Humpback Whale
National Marine Sanctuary
Oahu Office
6600 Kalanianaʻole Hwy., Suite 301
Honolulu, Hawaii 96825
June 2006

TABLE OF CONTENTS

Introduction.....	18
Study Area.....	19
Methodology.....	21
Census Procedures.....	23
Behavioral Observations.....	23
Definitions of Behavior.....	23
Results.....	24
Volunteer Participation.....	24
Census Results for Kahoolawe.....	24
Census Results for Oahu, Kauai, Hawaii.....	25
Behavioral Observations.....	25
Definitions.....	15
Literature Cited.....	28

LIST OF FIGURES

1. Island of Oahu: location of the 25 shore-based sites where the humpback whale census was conducted between 2002 and 2005.....19
2. Island of Kauai: location of the 16 shore-based sites where the humpback whale census was conducted between 2002 and 2005.....20
3. Island of Hawaii: location of the 22 shore-based sites where the humpback whale census was conducted between 2002 and 2005.....21
4. Island of Kahoolawe: location of the one shore-based sites where the humpback whale census was conducted between 2003 and 2005.....22
5. Average number of humpback whales counted per shore-based site during the months of January, February, and March 2002-2005 around the islands of Oahu, Kauai and Hawaii combined.....25
6. Average number of humpback whales counted per year between 2002 and 2005, during the months of January, February, and March combined, varied slightly between years with consistently lower numbers in March.....26
7. Average number of humpback whales counted per year between 2002 and 2005, during the months of January, February, and March combined, varied slightly between years with consistently lower numbers in March.27

OAHU

8. Average number of whales (+SD) counted at Ewa Beach Park during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....29
9. Average number of whales (+SD) counted at Ko Olina during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....30
10. Average number of whales (+SD) counted at Maili Point during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....31
11. Average number of whales (+SD) counted at Makua Cave during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....32
12. Average number of whales (+SD) counted at Kaena Point West during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....33
13. Average number of whales (+SD) counted at Kaena Point North during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.34

14. Average number of whales (+SD) counted at Mokuleia Beach Park during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.35
15. Average number of whales (+SD) counted at Puaena Point during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....36
16. Average number of whales (+SD) counted at Shark's Cove during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....37
17. Average number of whales (+SD) counted at Turtle Bay during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005..... 38
18. Average number of whales (+SD) counted at Laie Point during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....39
19. Average number of whales (+SD) counted at Hauula Beach Park during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....40
20. Average number of whales (+SD) counted at Kualoa Ranch (Bunkers) during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....41
21. Average number of whales (+SD) counted at Pyramid Rock during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....42
22. Average number of whales (+SD) counted at Mokapu Point during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....43
23. Average number of whales (+SD) counted at Lanikai during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....44
24. Average number of whales (+SD) counted at Makapuu Point Lighthouse during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....46
25. Average number of whales (+SD) counted at Halona Blowhole during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....47
26. Average number of whales (+SD) counted at Lanai Lookout during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....48
27. Average number of whales (+SD) counted at Hanauma Bay during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....49
28. Average number of whales (+SD) counted at Spitting Caves during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....50

29. Average number of whales (+SD) counted at Diamond Head Lookout during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....51
30. Average number of whales (+SD) counted at Magic Island during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....52
31. Average number of whales (+SD) counted at Kakaako Beach Park during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....53

KAUAI

32. Average number of whales (+SD) counted at Lumahai Lookout during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....54
33. Average number of whales (+SD) counted at Princeville Hotel during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....55
34. Average number of whales (+SD) counted at Kilauea Point NWR during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....56
35. Average number of whales (+SD) counted at Kilauea Point NWR—Crater Hill during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....57
36. Average number of whales (+SD) counted at Kapaa Lookout during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.58
37. Average number of whales (+SD) counted at Ahukini State Recreation Pier during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....59
38. Average number of whales (+SD) counted at Ninini Lighthouse during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....60
39. Average number of whales (+SD) counted at Mahaulepu Haula during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....61
40. Average number of whales (+SD) counted at Mahaulepu Makawehi during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....62
41. Average number of whales (+SD) counted at Makahuena Point during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....63

42. Average number of whales (+SD) counted at Poipu Beach Park during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....64
43. Average number of whales (+SD) counted at Kaiwa Point during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....65
44. Average number of whales (+SD) counted at Port Allen Cemetery during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....66
45. Average number of whales (+SD) counted at Waimea Canyon Drive during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....67
46. Average number of whales (+SD) counted at PMRF during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....68

HAWAII

47. Average number of whales (+SD) counted at Punaluu Black Sand Beach Park during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....69
48. Average number of whales (+SD) counted at Ka Lae Park during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....70
49. Average number of whales (+SD) counted at Milolii Lookout during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.71
50. Average number of whales (+SD) counted at Hookena Beach Park during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....72
51. Average number of whales (+SD) counted at Honaunau during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....73
52. Average number of whales (+SD) counted at Keauhou Scenic Lookout during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....74
53. Average number of whales (+SD) counted at Keahole Point/Natural Energy Lab (OTEC) during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....75
54. Average number of whales (+SD) counted at Hualalai (Four Seasons Resort) during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....76

55. Average number of whales (+SD) counted at Puukohola Heiau National Park during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....77
56. Average number of whales (+SD) counted at Mile Marker 7 during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....78
57. Average number of whales (+SD) counted at Lapakahi State Historical Park during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....79
58. Average number of whales (+SD) counted at Kapaa Beach Park during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....80
59. Average number of whales (+SD) counted at Old Coast Guard Road during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.81
60. Average number of whales (+SD) counted at Upolu Point during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....82
61. Average number of whales (+SD) counted at Waipio Valley Lookout during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....83
62. Average number of whales (+SD) counted at Laupahoehoe Scenic Lookout during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.84
63. Average number of whales (+SD) counted at Onekahakaha Beach Park during nine 64.15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....85
64. Average number of whales (+SD) counted at Kumukahi Lighthouse during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....86
65. Average number of whales (+SD) counted at Kehena Lookout during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....87
66. Average number of whales (+SD) counted at Kaena Point during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....88
67. Average number of whales (+SD) counted at Paukaa Point during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....89
68. Average number of whales (+SD) counted at Ookala during nine 15 minute periods between 08:00 am and 12:45 pm between January and March 2002-2005.....90

LIST OF TABLES

1. Number of volunteers that participated in the annual census between 2002 and 2005 on each island.....24
2. Average number of humpback whales per 15-minute time slot (\pm Standard Deviation) counted from a single shore-based site on the island of Kahoolawe between 2003 and 2005.....24

OAHU

3. Average number of whales counted at Ewa Beach Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....29
4. Average number of whales counted at Ko Olina during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....30
5. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Ko Olina over the sampling period.....30
6. Average number of whales counted at Maili Point during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....31
7. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Maili Point over the sampling period.....31
8. Average number of whales counted at Makua Cave during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002 -2005.....32
9. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Makua Cave over the sampling period.....32
10. Average number of whales counted at Kaena Point West during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....33
11. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kaena Point West over the sampling period.....33
12. Average number of whales counted at Kaena Point North during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....34

13. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kaena Point North over the sampling period.....34
14. Average number of whales counted at Mokuleia Beach Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....35
15. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Mokuleia Beach Park over the sampling period.....35
16. Average number of whales counted at Puaena Point during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....36
17. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Puaena Point over the sampling period.....36
18. Average number of whales counted at Shark's Cove during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....37
19. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Shark's Cove over the sampling period.....37
20. Average number of whales counted at Turtle Bay during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....38
21. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Turtle Bay over the sampling period.....38
22. Average number of whales counted at Laie Point during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....39
23. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Laie Point over the sampling period.....39
24. Average number of whales counted at Hauula Beach Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....40
25. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Hauula Beach Park over the sampling period.....40

26. Average number of whales counted at Kualoa Ranch (Bunkers) during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....41
27. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kualoa Ranch (Bunkers) over the sampling period.....41
28. Average number of whales counted at Pyramid Rock during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005..... 42
29. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Pyramid Rock over the sampling period..... 42
30. Average number of whales counted at Mokapu Point during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005..... 43
31. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Mokapu Point over the sampling period.....43
32. Average number of whales counted at Lanikai during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....44
33. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Lanikai over the sampling period.....44
34. Average number of whales counted at Waimanalo Beach Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....45
35. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Waimanalo Beach Park over the sampling period.....45
36. Average number of whales counted at Makapuu Point Lighthouse during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....46
37. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Makapuu Point Lighthouse over the sampling period.....46
38. Average number of whales counted at Halona Blowhole during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....47

39. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Halona Blowhole over the sampling period.....47
40. Average number of whales counted at Lanai Lookout during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....48
41. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Lanai Lookout over the sampling period.....48
42. Average number of whales counted at Hanauma Bay during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....49
43. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Hanauma Bay over the sampling period.....49
44. Average number of whales counted at Spitting Caves during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....50
45. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Spitting Caves over the sampling period.....50
46. Average number of whales counted at Diamond Head Lookout during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....51
47. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Diamond Head Lookout over the sampling period.....51
48. Average number of whales counted at Magic Island during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....52
49. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Magic Island over the sampling period.....52
50. Average number of whales counted at Kakaako Beach Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....53
51. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kakaako Beach Park over the sampling period.....53

KAUAI

52. Average number of whales counted at Lumahai Lookout during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....54
53. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Lumahai Lookout over the sampling period.....54
54. Average number of whales counted at Princeville Hotel during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....55
55. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Princeville Hotel over the sampling period.....55
56. Average number of whales counted at Kilauea Point NWR during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....56
57. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kilauea Point NWR over the sampling period.....56
58. Average number of whales counted at Kilauea Point NWR, Crater Hill during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.57
59. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kilauea Point NWR, Crater Hill over the sampling period.....57
60. Average number of whales counted at Kapaa Lookout during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....58
61. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kapaa Lookout over the sampling period.....58
62. Average number of whales counted at Akuhini State Recreation Pier during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.59
63. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Akuhini State Recreation Pier over the sampling period.....59
64. Average number of whales counted at Ninini Lighthouse during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....60
65. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Ninini Lighthouse over the sampling period.....60

66. Average number of whales counted at Mahaulepu Haula during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005..... 61
67. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Mahaulepu Haula over the sampling period..... 61
68. Average number of whales counted at Mahaulepu Makawehi during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005..... 62
69. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Mahaulepu Makawehi over the sampling period.....62
70. Average number of whales counted at Makahuena Point during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005..... 63
71. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Makahuena Point over the sampling period.....63
72. Average number of whales counted at Poipu Beach Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....64
73. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Poipu Beach Park over the sampling period.....64
74. Average number of whales counted at Kaiwa Point during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....65
75. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kaiwa Point over the sampling period.....65
76. Average number of whales counted at Port Allen Cemetery during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....66
77. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Port Allen Cemetery over the sampling period.....66
78. Average number of whales counted at Waimea Canyon Drive during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....67

79. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Waimea Canyon Drive over the sampling period.....67
80. Average number of whales counted at PMRF during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....68
81. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at PMRF over the sampling period.....68

HAWAII

82. Average number of whales counted at Punaluu Black Sand Beach Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....69
83. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Punaluu Black Sand Beach Park over the sampling period.....69
84. Average number of whales counted at Ka Lae Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....70
85. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Ka Lae Park over the sampling period.....70
86. Average number of whales counted at Milolii Lookout during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....71
87. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Milolii Lookout over the sampling period.....71
88. Average number of whales counted at Hookena Beach Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....72
89. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Hookena Beach Park over the sampling period.....72
90. Average number of whales counted at Honaunau during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....73
91. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Honaunau over the sampling period.....73

92. Average number of whales counted at Keauhou Scenic Lookout during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....74
93. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Keauhou Scenic Lookout over the sampling period.....74
94. Average number of whales counted at Keahole Point/Natural Energy Lab (OTEC) during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....75
95. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Keahole Point/Natural Energy Lab (OTEC) over the sampling period.....75
96. Average number of whales counted at Hualalai (Four Seasons Resort) during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....76
97. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Hualalai (Four Seasons Resort) over the sampling period.....76
98. Average number of whales counted at Puukohola Heiau National Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....77
99. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Puukohola Heiau National Park over the sampling period.....77
100. Average number of whales counted at Mile Marker 7 during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....78
101. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Mile Marker 7 over the sampling period.....78
102. Average number of whales counted at Lapakahi State Historical Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....79
103. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Lapakahi State Historical Park over the sampling period.....79
104. Average number of whales counted at Kapaa Beach Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....80

105. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kapaa Beach Park over the sampling period.....80
106. Average number of whales counted at Old Coast Guard Road during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....81
107. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Old Coast Guard Road over the sampling period.....81
108. Average number of whales counted at Upolu Point during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....82
109. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Upolu Point over the sampling period.....82
110. Average number of whales counted at Waipio Valley Lookout during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....83
111. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Waipio Valley Lookout over the sampling period.....83
112. Average number of whales counted at Laupahoehoe Scenic Lookout during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....84
113. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Laupahoehoe Scenic Lookout over the sampling period.....84
114. Average number of whales counted at Onekahakaha Beach Park during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....85
115. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Onekahakaha Beach Park over the sampling period.....85
116. Average number of whales counted at Kumukahi Lighthouse during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....86
117. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kumukahi Lighthouse over the sampling period.....86
118. Average number of whales counted at Kehena Lookout during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....87

119. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kehena Lookout over the sampling period.....87
120. Average number of whales counted at Kaena Point during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....88
121. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Kaena Point over the sampling period.....88
122. Average number of whales counted at Paukaa Point during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....89
123. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Paukaa Point over the sampling period.....89
124. Average number of whales counted at Ookala during nine 15-minute periods between 08:00 am and 12:15 pm between January and March 2002-2005.....90
125. Average number of breaches and body slaps (used as an index of whale surface activity) per whale at Ookala over the sampling period.....90
